ANKUSH MISHRA

mishraankush | ankushmishra5007@gmail.com | +91 8130506629 | Noida, India

SUMMARY

Senior DevOps Engineer with **4.5 years** of experience architecting and automating **scalable cloud infrastructure** and **CI/CD pipelines** on AWS and Azure. Expertise in **Infrastructure as Code** (Terraform, Helm), **Kubernetes** (AWS EKS Fargate), **GitOps** (ArgoCD, GitHub Actions, Jenkins), and **observability** (Prometheus, Grafana, Loki, ELK). Proven record of accelerating deployment velocity, reducing operational overhead, and ensuring **high-availability** production systems. AWS- and Azure-certified.

SKILLS

Cloud	AWS, Azure, GCP
IaC & Config	Terraform, Helm, Ansible
Containers	Kubernetes, AWS EKS Fargate, Docker
CI/CD & GitOps	Jenkins, GitHub Actions, ArgoCD, Git
Observability	Prometheus, Grafana, Loki, ELK Stack, CloudWatch
Languages & Data	Python, Bash; SQL, Redis, Memcached
Networking	Traefik (Ingress), Cloudflare DNS, VPC, Load Balancers

EXPERIENCE

Senior DevOps Engineer Dec 2025 – Present
Astro Arun Pandit Pvt. Ltd. *Noida, India*

- Lead **end-to-end DevOps operations** independently for the Horocosmo application on **AWS**, owning compute, networking, security, monitoring, and **cost optimization**.
- Designed and maintained **CI/CD pipelines** enabling smooth, reliable, fully automated deployments and faster release cycles.
- Implemented **AWS cost optimization** strategies including right-sizing compute, leveraging spot and reserved instances, and eliminating idle resources, reducing monthly cloud spend by **20–30%**.
- Streamlined **CI/CD deployment workflows** and automated release processes, cutting deployment time by ∼**40%** and increasing release frequency.
- Drove an initiative to **internalize DevOps processes** and infrastructure control, reducing dependency on external vendors.
- Partnered with development teams to streamline releases and ensure **high availability, scalability, and performance** of production systems.

DevOps Engineer Oct 2025 – Dec 2025
Talentelgia Pvt. Ltd. *Mohali, India*

- Managed **end-to-end DevOps** activities including CI/CD pipeline setup, deployment automation, and environment configuration across dev and production.
- Handled **on-premises infrastructure** deployments, ensuring high availability of internally hosted applications.
- Implemented **monitoring and logging** solutions for improved visibility and rapid issue resolution.
- Managed access controls, server maintenance, and patching to ensure **security and compliance**.

DevOps Engineer Dec 2021 – Sep 2025
HCL Technologies *Noida, India*

- Engineered scalable, **serverless container architectures** on **AWS EKS Fargate**, optimizing resource allocation and reducing operational overhead.
- Provisioned full production and dev infrastructure on AWS using **Terraform**, ensuring environment consistency and compliance.

- Designed and maintained **production-grade Helm charts** following best practices, improving Kubernetes deployment automation.
- Implemented **GitOps workflows** integrating ArgoCD and Helm to automate CI/CD pipelines and improve deployment reliability.
- Developed multiple **Jenkins pipelines** (Jenkinsfiles) and Bash scripts to automate routine tasks and boost developer productivity.
- Configured Kubernetes networking with **Traefik Ingress** and DNS routing via **Cloudflare** for secure, efficient traffic flow.
- Deployed **observability stacks** (Prometheus, Grafana, Loki) on Kubernetes for proactive monitoring and alerting, including Azure Kubernetes workloads.

Software Engineer Nov 2020 – Nov 2021
HCL Technologies *Noida, India*

- Managed user operations on **JDA WMS**, RedPrairie, and JDA Demand & Supply systems for Stanley Black & Decker (SBD).
- Supported COTS applications and ensured **SOX compliance** through detailed test case creation and validation.
- Performed back-end database testing using complex **SQL** queries to validate data integrity across multiple tables.

PROJECTS

GitOps CI/CD with GitHub Actions and ArgoCD on Kubernetes
Built a GitOps workflow automating testing, building, and pushing Docker images to **AWS ECR** via GitHub Actions; automated Helm chart deployment to **AWS EKS** using ArgoCD.

Automated CI/CD Pipeline for Web Apps (Python/Django, Node.js, React)
Engineered a Jenkins pipeline with GitHub webhook triggers, boosting deployment velocity by **40%** and release frequency by **50%**; integrated **SonarQube**, OWASP, and Trivy scanning with ArgoCD GitOps deployment for a **35%** security and speed improvement.

AWS Infrastructure Provisioning with Terraform
Built an end-to-end AWS stack as code with reusable **Terraform modules** (VPC, subnets, security groups, EC2, load balancers), achieving a **30%** improvement in deployment efficiency.

EDUCATION

Master of Computer Applications (MCA) 2025 – 2027
Kurukshetra University, Haryana

Bachelor of Computer Applications (BCA) 2021 – 2024
SASTRA University, Tamil Nadu *CGPA: 8.55 / 10*

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate | Verify here.
- AWS Certified SysOps Administrator – Associate | Verify here.
- AWS Certified Cloud Practitioner | Verify here.
- Microsoft Certified: Azure Fundamentals | Verify here.

ACHIEVEMENTS

- Received a client Appreciation Certificate from Stanley Black & Decker (SBD) for outstanding contribution.
