## SUMMARY

Senior Full Stack Developer with 4+ years of experience building and modernizing scalable web and mobile applications using React, Next.js, Node.js, NestJS, TypeScript, MySQL, and MongoDB. Strong experience in enterprise application development, REST API development, microservices, legacy system migration, authentication and RBAC, payment integrations, cloud infrastructure, CI/CD, and automated testing. Hands-on experience delivering healthcare, event management, e-commerce, and operational platforms across frontend, backend, mobile, QA automation, and DevOps. Experienced in AI-assisted development using Cursor and Claude for codebase analysis, implementation, debugging, refactoring, testing, and documentation.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, SQL, HTML5, CSS3
**Frontend:** React.js, Next.js 15, React 19, Redux Toolkit, Tailwind CSS, Material UI, Radix UI, React Hook Form, TanStack Query
**Backend:** Node.js, NestJS, Express.js, Django, Django REST Framework, REST APIs, GraphQL, Hasura, TypeORM, Microservices
**Databases:** MySQL, MongoDB, SQL Query Optimization, Database Indexing, Schema Design, Joins
**Mobile:** React Native, API Integration, Push Notifications, Offline Storage
**Authentication and Security:** JWT, Passport.js, RBAC, ACL, Role-Based Access Control, API Authentication, DTO Validation
**Cloud and DevOps:** AWS EC2, AWS S3, Docker, Jenkins, Kubernetes, Helm, Nginx, CI/CD, Linux, VPS, SSL Automation
**Testing:** Playwright, E2E Testing, API Testing, Regression Testing, API Parity Testing, RBAC Testing, Postman
**Integrations:** Amazon Chime SDK, M-Pesa, Flutterwave, PayU, Firebase, Google Maps, eTIMS, Insurance APIs
**AI Development Tools:** Cursor, Claude AI, AI-Assisted Development, Codebase Analysis, Debugging, Refactoring, Test Generation, Documentation
**Development Tools:** Git, GitHub, VS Code, Postman, AWS CLI, Docker Desktop, Bash

## PROFESSIONAL EXPERIENCE

**Senior Full Stack Developer** — **Oct 2025 – Present**
*TeamArcs Technologies India* — *Delhi, India*

- Core developer for the **Livia Healthcare Platform (HMIS)**, a multi-portal healthcare ecosystem consisting of admin, doctor, patient, and three React Native mobile applications backed by **7 NestJS microservices** and MySQL.
- Contributed to the migration of **48 modules from a legacy PHP monolith to Next.js 15, React 19, and NestJS**, maintaining existing API contracts, database structures, workflows, and business rules.
- Developed and maintained **50+ healthcare admin modules** covering order management, insurance claims, pre-authorization, pharmacy, prescriptions, drug formulary, subscriptions, payments, doctors, appointments, RBAC, CMS, eTIMS, and analytics.
- Built reusable frontend architecture using **React, Next.js, Redux Toolkit, TypeScript, Tailwind CSS, MUI, and Radix UI**, including server-side search, filtering, sorting, pagination, debouncing, and reusable data-table patterns.
- Implemented **Excel and CSV export functionality** using ExcelJS and XLSX, including optimized processing for large insurance datasets.
- Developed the doctor web portal with appointment scheduling, calendar workflows, clinical documentation using TinyMCE, and **Amazon Chime SDK** for telemedicine video consultations.
- Developed patient-facing workflows using React, MUI, Radix UI, and React Hook Form for bookings, prescriptions, order tracking, and healthcare operations.
- Contributed to three **React Native applications** for patients, doctors, and pharmacies, including API integration, push notifications, offline storage, and legacy-versus-new endpoint validation.
- Developed NestJS backend services using **Controller, Service, Repository, and DTO architecture** with ValidationPipe, centralized exception handling, response transformation, Winston logging, and Swagger documentation.
- Implemented **JWT authentication, Passport.js, RBAC, and ACL controls across 20+ user types**, with parameterized SQL queries and optimized database joins for transactional healthcare workflows.
- Integrated **M-Pesa, Flutterwave, insurance payer APIs, KRA eTIMS, AWS S3 presigned URLs, Firebase notifications, and Google Maps** into production healthcare workflows.
- Built a dedicated **NestJS scheduler service with 25 scheduled jobs and distributed locking** for insurance claims, OAuth token refresh, payment reconciliation, eTIMS invoicing, subscriptions, payment batching, and SLA-

based workflows.

- Created a **57-flow Playwright E2E automation suite** using page-object architecture, reusable authentication setup, and regression test coverage across major healthcare modules.
- Developed an automated **legacy-vs-new API parity testing framework** for comparing API responses across environments and validating migration consistency.
- Developed **RBAC and ACL verification tooling** using multi-role JWT generation, permission-matrix validation, guest-access testing, and reviewable Excel reports.
- Created QA test cases for **40+ modules** and produced 150+ technical documents including API documentation, migration blueprints, architecture documentation, and stakeholder guides.
- Maintained **Jenkins CI/CD pipelines, Docker containers, Kubernetes/Helm deployments, and Nginx** configurations across multiple applications and backend services.
- Used **Cursor and Claude AI** for large-codebase analysis, legacy migration analysis, implementation, debugging, refactoring, test generation, documentation, and development productivity.
- Diagnosed and resolved platform-wide **timezone and date-parity issues** involving Africa/Nairobi and UTC across frontend applications, backend APIs, receipts, and mobile clients.

**Full Stack Developer & DevOps Engineer** **Dec 2024 – Oct 2025**
*Ebslon Infotech* *Delhi, India*

- Developed scalable web applications using React, Next.js, Node.js, and TypeScript, improving application performance by approximately **25%**.
- Designed and implemented **Jenkins CI/CD pipelines**, reducing deployment time by approximately **50%**.
- Managed AWS EC2 infrastructure, load balancers, and auto-scaling configurations to maintain approximately **99.9% uptime**.
- Automated SSL certificate issuance using Let's Encrypt and streamlined DNS and deployment workflows.
- Mentored junior developers and promoted reusable architecture, coding standards, code review practices, and deployment best practices.

**Full Stack Developer** **Feb 2024 – Sep 2024**
*Badho Technologies / OnoSuite* *Delhi, India*

- Developed and maintained Next.js applications using GraphQL, Hasura, TypeScript, and third-party API integrations.
- Built REST and GraphQL APIs and implemented rate limiting, authentication, and external service integrations.
- Improved food-ordering platforms for enterprise clients including Wow Momo and Baskin Robbins, achieving approximately **12–20% reduction in processing time**.
- Managed VPS hosting, automated backups, deployments, and production availability for client platforms.

**Full Stack Developer** **Jan 2022 – Feb 2024**
*Gajanan Parcel Services* *Delhi, India*

- Developed company website, admin panel, and backend systems using **React, Django, Django REST Framework, Node.js, and Express.js** to digitize parcel operations.
- Built REST APIs for parcel creation, shipment tracking, status management, and administrative workflows.
- Developed responsive React administration interfaces and optimized frontend performance using code splitting and lazy loading.
- Designed MongoDB schemas and indexing strategies for efficient high-volume data retrieval.
- Deployed full-stack applications on VPS infrastructure with SSL automation, monitoring, backups, and high-availability configurations.

## KEY PROJECTS

**Livia Healthcare Platform (HMIS)**

- Enterprise healthcare platform covering administration, doctor workflows, patient workflows, pharmacy operations, insurance, orders, payments, telemedicine, and mobile applications.
- **Technology:** Next.js 15, React 19, TypeScript, Redux Toolkit, NestJS, TypeORM, MySQL, React Native, Amazon Chime SDK, AWS S3, Playwright, Jenkins, Docker, Kubernetes, Helm.

**Marriage Registration Portal**

- Built an end-to-end registration platform with admin workflows, PayU payment integration, NextAuth authentication, and React Query API caching.

**Enterprise Event Management Platform**

- Developed an event management platform with lead management, Zoho Books API integration, automated cron jobs, billing workflows, and advanced admin controls.

**Cold Storage Design and Equipment Tool**

- Developed a heat-load calculation and equipment recommendation system using React, Node.js, and MongoDB with

real-time configuration and administration workflows.

## KEY ACHIEVEMENTS

- Delivered **15+ projects** for enterprise clients including Wow Momo, Baskin Robbins, and Taco Bell.
- Reduced deployment time by approximately **50%** through CI/CD automation and improved production reliability to approximately **99.9% uptime**.
- Improved API performance by approximately **30%** through database query optimization and caching strategies.
- Led and mentored a team of **4 developers** while supporting consistent project delivery and engineering standards.

## EDUCATION

**Bachelor of Technology** May 2019
Guru Gobind Singh Indraprastha University, Delhi

**Industry Ready Certification in Full Stack Development** May 2022
NxtWave Disruptive Technologies, Delhi

## CERTIFICATIONS

- AWS Solutions Architect Associate – In Progress
- Jenkins Certified Engineer
- MongoDB Certified Developer
- Full Stack Development Certification – NxtWave Technologies
